“

I completed three co-ops with Rudolph Libbe Group and with each one I gained an entirely new skill set. Those co-ops have prepared me for a full-time Project Engineer position after graduation and equipped me with professional and intrapersonal skills that I will use for the rest of my life. I could not have asked for a better experience at this company.

“

I quickly discovered that the environment at RLG is incredibly supportive, with everyone eager to assist. This encouragement helped me build confidence and gain a clear understanding of what fieldwork and hands-on learning truly entail. I deeply value the opportunities this co-op has provided to learn and grow.

“

I would recommend an RLG co-op to anyone who is interested in working in construction. The variety of projects that I get to see from start to finish, as well as all the different ways I get to assist (especially in VDC) were extremely valuable to me. From my first co-op to my current, my managers have found ways to keep me learning, engaged, and excited to come to work.
