

MODULAR OFFICE BUILDING & WALL SYSTEMS

ECONOMICAL. VERSATILE. SUSTAINABLE.

Planning to remodel or expand your plant? Consider prefabricated modular enclosures for processes and people. Starrco gives you clean and professional enclosed spaces that can be constructed easily and just as easily disassembled and reused. This built-in flexibility lets you reconfigure space to respond quickly to changes in your business. In most cases, prefabricated modular enclosures also are a more economical long-term investment than conventional construction.

THE FLEXIBILITY AND QUALITY YOUR FACILITY REQUIRES

- Starrco systems are frequently used in distribution centers and manufacturing sites for office space and equipment enclosures.
- Starrco's flexibility allows two-story building construction with no need for a mezzanine - offering customers flexibility, tax advantages and limited interruption to their ongoing facility activities during the construction process.
- When Starrco systems are disassembled, 95 percent of the material can be reused and reconfigured.
- Starrco's gypsum board is made of 95 percent post-consumer materials and paper facing made of 100 percent recycled material.
- Starrco modular office buildings are composed of aluminum frame work that is 70 percent reclaimed or scrap material.
